KISHORE KUMAR S

Full Stack Developer | Backend Focused | Node.js | Laravel | MERN Stack

Vellore, Tamil Nadu, India | +91 93442 91464 | kishore787120@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Backend-focused Full Stack Developer with 3+ years of experience building enterprise-grade server-side systems using Node.js, Express.js, Laravel, PHP, MongoDB, and MySQL. Specialised in RESTful API design, JWT/OAuth 2.0 authentication, RBAC, real-time systems, and AWS cloud infrastructure. Delivered MERN stack ERP platforms for cooperative finance operations, a government procurement automation platform, and a KYC/AML compliance solution for financial sector clients. Practised in Agile/Scrum delivery and AI-assisted development using Claude Code.

TECHNICAL SKILLS

Backend:	Node.js, Express.js, PHP, Laravel, REST API Design, JWT, OAuth 2.0, MVC Architecture, Microservices
Frontend:	React, Redux, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, SCSS, Bootstrap, jQuery
Databases:	MongoDB, MySQL, Redis, MongoDB Aggregation Pipelines, Query Optimisation
Cloud & DevOps:	AWS (EC2, S3), Linux, Git, Bitbucket, CI/CD Pipelines, GitHub Actions
Real-Time & Integrations:	WebSocket, Socket.IO, Pusher, Redis Pub/Sub, RESTful APIs, Firebase, WhatsApp Business API, Payment Gateways
Security & Performance:	RBAC, Field Encryption, Rate Limiting, Secure Bid Management, API Security, Lazy Loading
Methodologies & Tools:	Agile, Scrum, Code Review, Version Control, Claude Code (AI-assisted development)
Domain Knowledge:	ERP (Finance, Procurement, HR, Payroll), KYC/AML Compliance, Government Procurement, RBAC

PROFESSIONAL EXPERIENCE

Full Stack Developer | KLabs Technology, Chennai — April 2026 – Present

- Architect and deliver full-stack enterprise applications using Node.js, Express.js, React, MongoDB, and MySQL for government and cooperative sector clients across 2 major platforms.
- Design and implement secure RESTful APIs with RBAC, JWT authentication, field-level encryption, and multi-level approval workflows to meet enterprise and government security standards.
- Build real-time notification and alert systems, immutable audit trail modules, and automated PDF/Excel export pipelines for business reporting and regulatory compliance.
- Integrate AWS S3 for centralised document storage and deploy scalable backend services on AWS EC2; manage cloud infrastructure for production environments.
- Collaborate directly with government departments and cooperative management teams to translate complex domain requirements into robust, maintainable software solutions.
- Leverage Claude Code for API scaffolding, code generation, and automated documentation — reducing development overhead by an estimated 30% and maintaining consistent code structure across platforms.

Full Stack Developer | Selvi Software Technologies Pvt. Ltd., Vellore — January 2023 – April 2026

- Developed and maintained 10+ production full-stack web applications across logistics, retail, and services sectors using Laravel, Node.js, React, and MySQL/MongoDB, serving diverse client business workflows.
- Designed and exposed 20+ RESTful APIs with JWT authentication, OAuth 2.0 (Google, Facebook), Passport, and middleware validation — consumed by both web and mobile client applications.
- Built real-time communication features using Socket.IO and Pusher including live notifications, event broadcasting, and WebSocket-based interactions, significantly improving system responsiveness and user engagement.
- Integrated 8+ third-party platforms including payment gateways, Firebase push notifications, WhatsApp Business API, and logistics APIs; implemented secure multi-provider authentication across multiple production systems.
- Optimised MySQL query execution plans and MongoDB aggregation pipelines, delivering measurable throughput improvements across high-traffic modules; led legacy Laravel modernisation reducing technical debt.
- Followed Agile/Scrum delivery practices with Git/Bitbucket version control; contributed to structured code reviews and CI/CD deployment pipelines.

KEY PROJECTS

Cooperative Society ERP — Finance, Operations & Payroll Platform

Tech Stack: *Node.js, Express.js, React, Redux, MongoDB, MySQL, AWS S3, AWS EC2, Socket.IO, JWT*

- Architected a full-stack ERP platform for cooperative societies, digitising end-to-end finance operations including income/expense tracking, ledger management, and automated account reconciliation — replacing manual registers and disconnected spreadsheets entirely.
- Built a Purchase & Sales module enabling goods procurement, vendor management, sales invoicing, and real-time stock movement tracking; developed Payroll module automating salary calculations, allowances, deductions, payslip generation, and monthly summaries for cooperative staff.
- Designed RBAC dashboards for administrators, accountants, and supervisors; engineered 15+ modular RESTful APIs; optimised MongoDB aggregation pipelines and MySQL queries improving report performance by 35%; delivered automated PDF/Excel exports eliminating manual reporting cycles.

JPC Procurement Platform — Government CWS Store Automation

Tech Stack: *Node.js, Express.js, React, Redux, MongoDB, AWS S3, AWS EC2, WhatsApp API, JWT, Field Encryption*

- Designed and delivered a full-stack government procurement automation platform for CWS (Central Warehousing Stores), replacing paper-based JPC workflows with a transparent, auditable, and regulation-ready digital system.
- Built Indent Creation module with multi-level digital approval workflows; developed Tender Management module enabling registered suppliers to view tenders, submit bids, and upload documents — bringing full transparency to the government procurement lifecycle.
- Implemented Supplier Registration & Verification portal with eligibility validation and admin approvals; engineered encrypted price quoting system accessible only to authorised evaluation committee members, preventing bid manipulation and ensuring procurement integrity.
- Built comprehensive audit trail and version history modules for all indent, tender, and evaluation activities to ensure full regulatory traceability and compliance with government procurement standards.

KYC / AML Compliance Platform — Financial Sector

Tech Stack: *Node.js, Express.js, React, Redux, MongoDB, JWT, OAuth 2.0, WhatsApp API, Document OCR APIs*

- Built a full-scale KYC/AML compliance platform automating customer identity verification, risk scoring, and end-to-end regulatory onboarding workflows for financial sector clients.
- Integrated 3+ identity verification APIs including document OCR, liveness detection, and PEP/sanctions screening — automating over 80% of KYC verification checks; implemented AML transaction monitoring dashboards with configurable Node.js rule engines to detect and flag suspicious activities.
- Engineered immutable audit trail and case management modules in MongoDB for regulatory traceability; implemented JWT/OAuth 2.0 RBAC for compliance officers, analysts, and admins; configured multi-channel notification pipelines via WhatsApp and email for KYC updates and escalations.

Multi-Domain Enterprise Application Portfolio

Tech Stack: *Laravel, PHP, Node.js, Express.js, React, Redux, MySQL, MongoDB, AWS, Socket.IO, Pusher, Firebase, JWT*

- Designed and delivered 10+ production applications spanning logistics, retail, and services using Laravel and Node.js — with real-time Socket.IO communication, multi-provider authentication (JWT, OAuth 2.0, Passport), and role-based access control.
- Integrated hardware and IoT systems including a Java-based Camera SDK for automated gantry control, MIFARE Classic 1K smart cards for transit entry validation, and a robot live-streaming platform enabling remote video feed monitoring via web interfaces.

EDUCATION

Bachelor of Commerce (B.Com) | Thiruvalluvar University, Vellore — 2022
Higher Secondary Certificate (HSC) | NKM Higher Secondary School, Vellore — 2019
Secondary School Certificate (SSLC) | NKM Higher Secondary School, Vellore — 2017

LANGUAGES

English — Professional Proficiency • **Tamil** — Native
